UTERINE FIBROID EMBOLIZATION CONSULTATION SERVICE AVAILABLE AT UT MEDICAL CENTER

UTERINE FIBROID EMBOLIZATION (UFE) - LEVEL A, ACOG RECOMMENDED ALTERNATIVE TO HYSTERECTOMY

“Based on long- and short-term outcomes, uterine artery embolization is a safe and effective option for appropriately selected women who wish to retain their uteri.”*

*ACOG Practice Bulletin No. 96: Alternatives to Hysterectomy in the Management of Leiomyomas *Obstet Gynecol* 2008 112: 387-400

COMPELLING CLINICAL RESULTS FOR UFE *References available upon request.

Uterus-sparing and effective symptom relief*

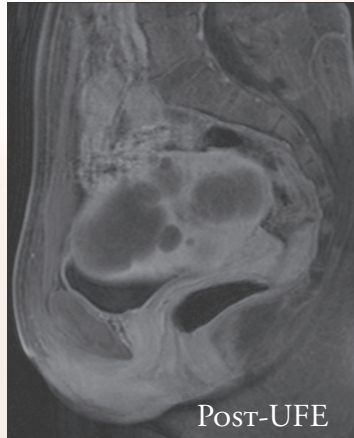

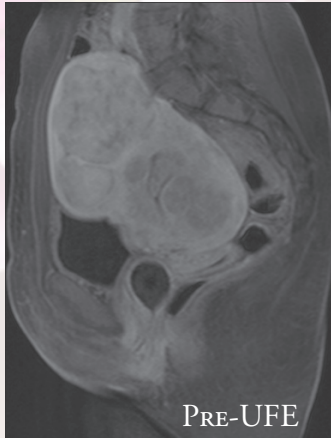

- Level I Randomized controlled and prospective comparative studies
- UFE effective compared to hysterectomy and myomectomy (bleeding and bulk symptoms)
- Faster recovery; fewer major complications

Reproducible quality-of-life outcomes – FIBROID Registry *

- SIR sponsored; 72-sites; 3,000+ patients enrolled; validated measures of outcomes; data managed by the DCRI; 6-, 12-, 24-, and 36-month follow-up
- Mean final score for both symptom and health-related quality-of-life outcomes normal by 6 months; continued at 12 months

5-year durability*

- 90/91% effective symptom improvement at 1-year; 73% continued symptom control at 5 years
- Fibroid recurrence rate after myomectomy 23-62% at 5+ years

WHY CHOOSE UNIVERSITY RADIOLOGY INTERVENTIONAL RADIOLOGISTS

The physicians of University Radiology are dedicated to patient care and providing not only their expertise in the performance of advanced non-invasive procedures like Uterine Fibroid Embolization, but have committed themselves to the *treatment* of the patient from consultation to follow up. Our physicians are a strong part of the patient's team of experts as they explore their options and treatment choices.

If you would like more information from our experts or to schedule a UFE procedure, please call us at 865-223-3045 or email IR@utrad.com.
