

The educators of the Staff Development department are focused on helping/guiding new employees to become acclimated to their new work environment. We focus on educating new nursing staff about policies and procedures of our institution. We incorporate specific training such as computer documentation and eMAR to help the new employee be successful at UT Medical Center. By providing classroom activities for all the nursing disciplines (RN, LPN, Paramedic, CNA, Nurse Tech, PCA, Unit Assist, and Monitor Tech) they are better prepared to work in our team based environment.
