

# Did you know...

## The University of Tennessee Medical Center rents Symphony pumps.

The only breastpump that truly mimics your baby's natural nursing rhythm, the Symphony Breastpump is the new "gold standard" in hospital-grade breastpumps:

- The most gentle, comfortable breastpump available
- Pumping pattern stimulates fast milk flow
- Convenient one-knob control to adjust speed and vacuum to your comfort
- Single or double pumping

### Why Rent?

Renting allows you to use a hospital-grade pump that has all the best features for your needs, at an economical cost compared to purchasing the same quality breastpump. If you are unsure as to how long you will need to use a breastpump, renting also gives you a way to try breastpumping without purchasing your own.
