

SISTERHOOD & STRENGTH: KNOW YOUR BODY, SAVE YOUR LIFE

Know Your Body: Breast cancer is the most common cancer among Black women. It has a mortality rate over 60% in Tennessee.

Screening Saves Lives: Mammograms and other screenings can detect breast cancer early, when it's most treatable.

Don't Let Fear Hold You Back: We hear your concerns about healthcare access and discrimination. Resources are available to help you get screened, regardless of your insurance or income status.

This event is free and the first 22 women that register will receive a \$25 gift card. Use QR code to REGISTER.
