

Wisdom for Your Life.

# Mission, Vision and Values

## *Our Mission*

To serve through healing,  
education and discovery

# Our mission It's Who We Are

The University of Tennessee Medical Center is a mission-driven organization.

As a not-for-profit organization, we exist for the sole purpose of carrying out our mission.

Those who look to us to serve them count on us to deliver on our mission every day.

**It's Who We Are.**

For this medical center to be successful all team members, as we work together, need to be able to connect our roles and contributions to our **Mission, Vision, and Values.**

Our **Mission** is who we are; why we exist; why we come to work everyday.

Our **Vision** is what we continually strive for in making ourselves better.

Our **Values** define the culture in which we carry out our work. It's how we work together. It's how we “do business”.

To serve through healing, education  
and discovery.

Transform the health of individuals in our region as a top-tier Academic Health System.
