

Regional Perinatal Program

Obstetric & Neonatal Education

As one of only five designated centers in Tennessee, the Regional Perinatal Program provides the Eastern region with specialized obstetrical care and neonatal services. Funding is provided by the state to assure that high-risk perinatal services and clinical education are in place statewide.

What type of training is provided?

Helping providers prepare for complex obstetric and neonatal conditions is an important goal of the Regional Perinatal Program. FREE training is provided for those in pre-hospital, clinical and hospital settings, including ancillary providers. Professional education classes and realistic emergency drills are conducted throughout the region using a range of simulation equipment, following evidence-based guidelines. With the goal of improving maternal and neonatal outcomes, our nurse clinical educators and staff take pride in the important training provided across the region.

CENTER FOR WOMEN & INFANTS

Our Mission | To serve through healing, education and discovery

Didactic Classes

- STABLE
- Neonatal Resuscitation Program (NRP)
- Emergency Preparedness
- Maternal Emergency in the ED
- AWHONN Obstetric Patient Safety
- Opioid Use Disorder in Pregnancy
- Perinatal Mood & Anxiety Disorder
- Trauma Responsive Care
- Gestational Diabetes Care & Treatment
- Fetal Monitoring - Basic, Intermediate, Advanced
- Breastfeeding

Simulations

- Delivery in the Field, OB Trauma/Critical Care Paramedics
- Neonatal Code Drills/Nursery, EMS & ED
- Maternal Hypertensive Crisis
- Maternal Hemorrhage
- Maternal Sepsis
- Precipitous Delivery with Mock Neonatal Code
- Prolapsed Cord
- Shoulder Dystocia
